

# **ah!Vertical Sliding**

# Vertical Sliding

## introduction

This opening system operates by connecting two or more vertical sliding glass panes through an internal counterweight system. Perfectly balanced the glass panes move effortlessly in opposite directions and are freed to cover large surface areas.

Système d'ouverture dont le fonctionnement se fait par le biais de contrepoids entre vitres, où les panneaux vitrés se déplacent sans effort dans des directions opposées, permettant la réalisation de grandes surfaces vitrées.
